RAMPF[®]
discover the future

Since 2015, Janus Worldwide has been supporting a partner relationship with the RAMPF Group, a leading international company in engineering and chemical solutions.

The RAMPF Group secures its presence on international markets with around 900 employees and six core competencies: RAMPF Machine Systems, RAMPF Production Systems, RAMPF Composite Solutions, RAMPF Eco Solutions, RAMPF Polymer Solutions and RAMPF Tooling Solutions.

RAMPF has selected Janus Worldwide to provide professional technical translations and adaptation of technical content for specifications and technical data sheets.

Challenges

- Providing a full service cycle: translation, editing, proofreading
- Providing project tracking and volume and cost control
- Mitigating risk and undertaking associated planning for complicated technical projects
- Ensuring consistent layout, style and terminology

Solutions

- Dedicated project managers and a linguistic team specializing in various areas
- Multi-language translations
- Development of the risk mitigation process for complicated rapid translations

Solution elements

- Complex technical translation services
- QA and proofreading services

From design engineering to final product launch, industrial companies face intense pressure to meet all regulatory and compliance requirements. Janus Worldwide is ISO 9001, ISO 17100 and ISO 13611 compliant, adding an additional layer of quality control process as a full service translation and local-

ization provider with multilingual solutions for the global manufacturing industry, including the heavy machinery, high-tech and electronics, automotive, industrial, chemicals and aerospace sectors.
